Background

In March 2008, the Boulder Economic Council conducted a study to help determine how many people regularly commute into work in the city of Boulder and where Boulder workers are commuting from. Information for the study was obtained from a brief survey of local employers asking for home zip codes of their employees who work in the city of Boulder.

Forty-four employers, representing a variety of businesses and organizations, participated in the study. Many of the city's largest employers including Array BioPharma, Ball Aerospace, Boulder Community Hospital, Celestial Seasonings, City of Boulder, Covidien, IBM, InfoPrint, LASP, Micro Motion, NIST, NOAA, Roche Colorado, The Camera, UCAR, University of Colorado and Webroot were participants. As a result, while the number of participating employers represents less than 1% of Boulder employers, the data they provided represents over one-fourth of the individuals who work in the city.

| City of Boulder | Total Number | Study Participants | Study Participants as % of Total |
|-----------------|--------------|--------------------|----------------------------------|
| Employers | 6,500 | 44 | 0.68% |
| Employees | 89,461 | 22,557 | 25.21% |

Information from this study provides a rough estimate of the commuting patterns of Boulder workers based on the information provided by study participants and compiled by the Boulder Economic Council. Due to the size and nature of the survey sample, results were not weighted to be representative of all employers in the city.

Summary of Findings

Based on the information provided by study participants, we estimate that of the individuals who work in the city of Boulder:

- Two-thirds live in Boulder County
 - 32% live in the city of Boulder, and
 - 35% live in other communities within the county
- 86% live in the Boulder area or nearby communities

Study data suggests there may be significant differences in commuting patterns for employees of different organizations and industries.

- The percent of employees who live in Boulder ranged from a low of 5% to a high of 82% among the employers that participated in the study.
- On average, industries that employ more Boulder residents include accommodations and food services, professional and technical services and government (includes CU).

**Data includes portions of Longmont and Erie in Weld County (some zip codes fall in more than one county)*

Note: Preliminary data from the study was provided to the Boulder Regional Business Partnership and included in the Boulder & Broomfield Counties Labor Migration Profile. This report includes data from six additional employers with a total of 2,900 employees.

Overall Commuting Patterns: Where Boulder Workers Live

Study findings suggest that approximately two-thirds of the people who work in the city of Boulder live in Boulder County. Nearly one third (32%) live in the city of Boulder. Nearly 20% live in nearby communities in Broomfield, Adams, Jefferson, Larimer and Weld counties.

Data from the study further suggests that many of the workers who commute into work in Boulder live in Longmont, Broomfield, Louisville/ Superior¹, Lafayette, or Erie.

Conclusions

Study findings suggest:

- Most of Boulder’s workers commute into the city, mostly from nearby communities.
 - An estimated 32% of those who work in Boulder also live in the city; 68% live outside the city.
 - Most of Boulder’s workers who live outside the city reside in Longmont (17%), Broomfield (7%), Louisville/Superior (7%), Lafayette (5%), Erie (3%), Northglenn (3%), Arvada (3%), Westminster (2%) or Golden (2%).
- The incidence of commuting into work in Boulder may be increasing.
 - According to US Census data for 2000, the most recent available, 40% of Boulder workers lived in the city.
